

Wavesoldering system for PCBs Mini Waver

The Mini Waver is a bench-top wavesoldering system for leaded, SMD or mixed boards. It is ideally suited for pre-production up to medium range production. The 8-hour throughput is typically 500 Euroboards of the size 100 x 160 mm (4 x 6.3").

Technical Specifications

Operating temperature range:	220...280 °C (428...536 °F)
Regulating accuracy:	± 2 °C (± 4 °F)
Solder pump drive:	DC servo motor
Control:	microprocessor-based plug-in unit, solid state power switching
Solder contents:	38 kg
Flux:	any foamable type of flux may be used
Max. solder area:	265 x 353 mm (10.5 x 13.9")
Heat-up time to 255 °C (473 °F):	approx. 90 minutes
Mains requirements:	230 V/2,2 kW, single phase, complies with CE
Dimensions:	L x D x H = 1000 x 520 x 300 mm (39.5 x 20.5 x 11.8")
Weight, ready for operation:	approx. 105 kg

Highest soldering quality in bench-top size

- ready for use within shortest time
- low power consumption
- no external installations
- minimum use of space
- top soldering quality at lowest cost
- lead free soldering 
- made in Switzerland
- **Discount price***
EUR 12'750.--

Do you remember talking about the bench-top soldering machine
Contasold 265?

Quality „made in Switzerland“ lives forever -
But it's called different!

Today we call it Mini Waver.

Profit from our **Discount!**

Do you belong to the
people who think about
the good old time?

Yes – so continue
