

Facts & Figures

Founding year:	1972
Legal Form:	Public limited cooperation (PLC)
Share capital	CHF 1.25 Millions
Acquisition by R.Lienhard/M.Köppel	2010
Head office:	EPM Handels AG Bahnhofstrasse 66 CH – 5605 Dottikon Tel +41 - 44 - 749 31 31 Fax +41 - 44 - 749 31 39 E-mail: epm@epm.ch Internet www.epm.ch

Business operations	EPM Handels AG focuses on the development, production, and worldwide distribution of selective and wave soldering systems for automatic soldering of printed circuit boards and modules in the electronics industry as well as related consulting, maintenance, and service. The company is active in direct sales as well as through a select partner network and is listed as an OEM partner for all major electronics manufacturers.
---------------------	---

Partner network	In order to meet the needs of our international customers, EPM works with qualified partners in a global competence network. The network partners are located in Asia, Australia, Europe, and the USA
-----------------	---

Product range	EPM soldering systems are offered as frame or finger machines with various soldering wave systems and flux applications. The systems range from small, table-sized soldering machines, small and medium-sized soldering systems, to fully automated, computer-aided duplex high-speed soldering machines that can simultaneously process leaded and lead-free solders in separate containers.
---------------	---

Range of services

EPM offers its customers comprehensive consulting services on issues relating to the entire soldering process, which should be the most important criterion when selecting a suitable soldering process. The service begins with setting up the processes, includes advice on the soldering tools to be used, and extends far beyond the design of the soldering application. Maintenance, a comprehensive range of training courses, and regular sample soldering for potential customers at the internal competence center sum up the offered range of services.

Target groups

EPM targets companies of all sizes, with a focus on mid-sized and large, global corporations that manufacture high-quality electronic equipment, apparatus, circuit boards, and modules. EPM soldering machines are industry-versatile and mostly used in the automotive industry, aerospace, medical technology, and consumer electronics.
